

SETT Framework?

The SETT framework for Assistive Technology(AT) promotes collaborative decision making around the consideration, acquisition, and implementation of AT tools and services. All members of the team contribute their perspectives: Teachers, Instructional Aides, Related Services, Parents, AND the most important member of the team, the Student!

S

Student

Who is the Student? What are their Strengths and Challenges?

E

Environment

What are the current materials, resources, supports, equipment currently available in the environment(s)?

T

Tasks

What are the naturally occurring activities that take place in the environment? What are the student's IEP goals? What modifications or accommodations might be made? How might technology support the student's active participation in those activities?

T

Tools

What no tech, low tech, high tech options should be considered for a student with these needs and abilities to do these tasks in these environments?
